Our products for the door area

Market Leader since 1986

ESCHA TSL GmbH is a member of the Turck group - Industrial Automation-, has been developing, manufacturing and marketing door-opening buttons, signal lights, warning indicators, and ready wiring systems for road- and railway vehicles since 1986. Patented buttons for interior- and exterior areas, million fold reliable switching under harsh operating conditions, fast realization of customers' requirements, and good service make ESCHA TSL GmbH the market leading manufacturer.

Since 2006, we have been providing our customers with individual solutions in LED-light technology supplementing our product portfolio for bus, train, and other sectors. ESCHA TSL is certified according to IRIS, DIN ISO9001, DIN ISO14001.

Special focus on people with reduced mobility

Our development and design make a particular point of our products being easily recognized and operated by people with reduced mobility. Buttons, switches, and lights comply with the recommendations of the associations and evidently meet the required standards and guidelines such as e.g. the **TSI-PRM**.

Your individual performance requirements

Your individual performance requirements are our challenge. Solutions are created through variations of our products or new developments specially for you. We are your partner when it comes to Touch, Switch, and Light and will readily provide you with comprehensive support.

Core competence

Our staff in sales, service, development, and production guarantee a successful product refinement. We combine everything in a strong company group: electronics-/mechanical-, development and production as well as tool-, plastics-technology and connectivity. We constantly invest in our know-how and technology. The requirements, however, come from you – our customers.
